D: KR2002-23063 A (LG ELECTRONICS Inc.) 2002-03-28

The present invention suggests a method and apparatus for forward or reverse intelligent skipping using a group of shots (GOS) holding shot information on the contents. And D also relates to a method and apparatus for video skipping using structural information on video contents.

On the other hand, the method for intelligent skipping described in claims 1-16 includes the process of executing forward or reverse intelligent skip based on information on the present play spot and shot segmentation information or GOS information composed of a long shot or a sequence of short shots. But this technology is not described in the prior art.

Therefore, the invention described in claims 1-16 has an inventive step under PCT Article 33(3).
